Re: Introduction of New Items to McLane Grocery

As previously communicated, McLane Grocery is seeking your support of the Global Data Synchronization Network (GDSN) and the 1WorldSync Product Introduction Solution. It is McLane's intent to utilize this solution for all future new item introductions. This platform improvement will eliminate the need for our suppliers and brokers to manually submit new item forms or fact sheets, and will increase visibility as well as speed to shelf for McLane, the supplier and our mutual customers.

The 1WorldSync Product Introduction solution is a **secure, web-based, industry platform** that helps facilitate standardized supplier and retailer *collaboration* on the new item setup process.

We would like to thank our suppliers that have signed up and are utilizing these solutions today.

We are asking that all of our suppliers follow the below instructions and begin the process of utilizing the GDSN and the 1WorldSync Product Introduction solution today for new and existing items with McLane.
